capacity analysis for developed solution

contributing to the security knowledge base

introduction to penetration tests

Where:

The internship will be held in **Lviv** but there will also be opportunity to complete practice in Polish cities like Cracow, Wroclaw, Poznan…

Benefits

When you take the opportunity to be a part of a real work project while you're still a student, you will quickly make a good network of contacts. Working for an actual client will not only allow you to meet people who work in the field you are studying, but also exchange useful contacts with them. In the future, you will know who to turn to in case of a problem, who can help you with their experience and who to count on when seeking new professional challenges. Besides, you gain:

- Mentor care: implementation of an IT project under the supervision of specialist
- Renumeration: we value your contribution to the project
- Possibility of continuing your career in Comarch – as many as 85% stay with us for longer
- Certificate of completion of the internship – include it in your CV
