It is important to keep up with the most recent trends and developments that are promising for the future. Participating in this online summer school will not only allow you to learn theoretical aspects about finance but also to interact with practitioners and experts from the university. Each course combines lectures and practical classes. The focus is on the implementation of theoretical concepts through practical examples.

A unique opportunity to expand your network and your soft skills!

Summer school courses:

—
Fintech
—

Cryptocurrencies: Trends and Features
—

Life Insurance Redefining
—

Data Analysis for Real Estate Price Forecasting
—

Prevention of Money Laundering and Fraud
